Maryland-Delaware-District of Columbia Water Science Center
Seminar Series

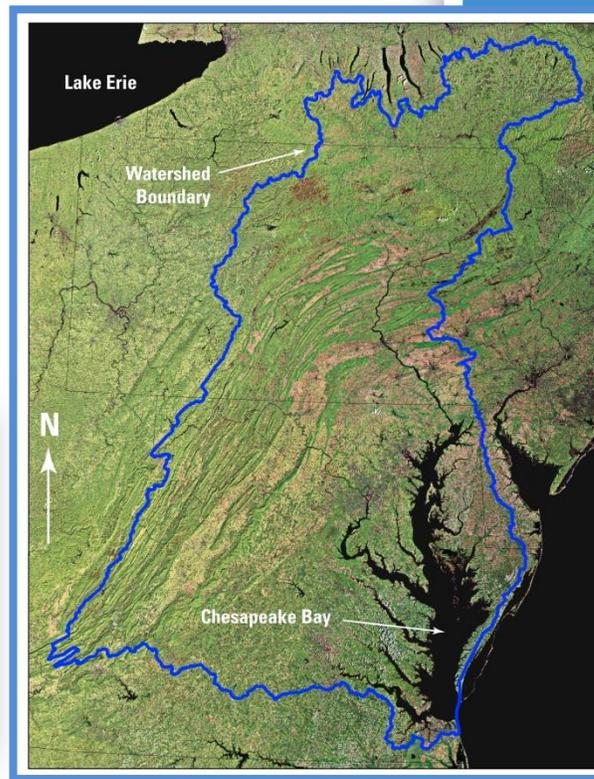

Wednesday, October 30, 2013 11:00-12:00

Overview of USGS science efforts to support the restoration and protection of the Chesapeake Bay and its watershed.

USGS Chesapeake Bay Coordinator, Scott Phillips, will discuss key USGS Chesapeake scientific findings and how the information is applied by partners. Topics will include nutrients and sediment sources and change; factors affecting the health of fish, wildlife and their habitats; and potential effects of the population growth and climate change.
